DETAILED ACTION

Claim Objections

1. Claims 1-19 are objected to because of the following informalities: the phrase in a parenthesis renders the claim indefinite because it is unclear whether the limitations in the parenthesis are part of the claimed invention. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2642

4. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sleevei (U.S. Patent No. 4,811,382).

Regarding claims 1-19, Sleevei teaches a method and apparatus for applying messages in a telecommunications network to calling parties during the times when the calling party is receiving ring-back signals while waiting for the called party to answer a call. By making use of this heretofore unused time, the telephone network facilities are utilized more effectively for the transmission of information. At the same time, messages are transmitted only during times when the telephone line is already occupied, so there is no increase in the extent to which available lines are tied up (column 2, line 29 through column 3, line 54). Sleevei does not explicitly teach details as claimed in the claims. However, those limitations lie fully under a normal capability of a person skilled in the art.

5. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshihi (JP06-121043) and LG Telecom LTD. (KR1999-46605).

See International Preliminary Examination Report.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blen et al. (U.S. Patent No. 5,652,784) teach an automatic telephone advertising provided in lieu of dial tone. Chavez, Jr. et al. (U.S. Patent No. 6,603,844) teach an advertised ring back in a telecommunication switching system.
